19ECEVAC01- DESIGN, IMPLEMENTATION AND ADMISSION OF CCNA

EVENT REPORT

Name of the Course: DESIGN, IMPLEMENTATION AND ADMISSION OF CCNA

Name of the Instructor: Dr.S. VeeraKumar, Professor, JEC

Year and Branch: II, III & ME-VLSI- ELECTRONICS AND COMMUNICATION ENGINEERING

Duration of Course: 35 Hrs (22.07.2019 to 27.07.2019)

SUMMARY OF THE EVENT:

The Course was inaugurated on **22.07.2019** at 8.30 am by our respectable Principal and HOD. As per the Course plan session was started and went smooth for the Remaining days. On the last day **27.07.2019** by 3.30 pm the course was Completed Successfully.

During the Six Days of the program Students were participated with enthusiasm and they finally gained Knowledge on “**Design, Implementation and Admission of CCNA**”

ASSESSMENT MODE:

No of Students Enrolled: 87

Scheme of Exam: Offline

No of Students appeared:87

No of Students Passed:87

Date of Exam: 27.07.2019

OUTCOME:

After finishing this course, the students will be equipped with a technical skill currently in demand in the job market along with the fundamental principles of networking further empowered for their future job prospects in CCNA. Understand and able to identify various components of computer networks. Explore and Implementation of Cisco Router. Enhance the knowledge of IPv6. STP and RSTP.

19ECEVAC01- DESIGN, IMPLEMENTATION AND ADMISSION OF CCNA

TEST QUESTIONS

1. During a routine inspection, a technician discovered that software that was installed on a computer was secretly collecting data about websites that were visited by users of the computer. Which type of threat is affecting this computer?
 - a) DoS attack
 - b) identity theft
 - c) spyware**
 - d) zero-day attack
2. Which term refers to a network that provides secure access to the corporate offices by suppliers, customers, and collaborators?
 - a) Internet
 - b) intranet
 - c) extranet**
 - d) extendednet
3. A large corporation has modified its network to allow users to access network resources from their personal laptops and smart phones. Which networking trend does this describe?
 - a) cloud computing
 - b) online collaboration
 - c) bring your own device**
 - d) video conferencing
4. What is an ISP?
 - a) It is a standards body that develops cabling and wiring standards for networking.
 - b) It is a protocol that establishes how computers within a local network communicate.
 - c) It is an organization that enables individuals and businesses to connect to the Internet.**
 - d) It is a networking device that combines the functionality of several different networking devices in one

5. Why is it difficult for routing loops to occur in networks that use link-state routing?
- a) Each router builds a simple view of the network based on hop count.
 - b) Routers flood the network with LSAs to discover routing loops.
 - c) Each router builds a complete and synchronized view of the network.**
 - d) Routers use hold-down timers to prevent routing loops.
6. An employee at a branch office is creating a quote for a customer. In order to do this, the employee needs to access confidential pricing information from internal servers at the Head Office. What type of network would the employee access?
- a) an intranet**
 - b) the internet
 - c) an extranet
 - d) a local area network
7. Which statement describes the use of powerline networking technology?
- a) New "smart" electrical cabling is used to extend an existing home LAN.
 - b) A home LAN is installed without the use of physical cabling.
 - c) A device connects to an existing home LAN using an adapter & an existing electrical outlet.**
 - d) Wireless access points use powerline adapters to distribute data through the home LAN.
8. A networking technician is working on the wireless network at a medical clinic. The technician accidentally sets up the wireless network so that patients can see the medical records data of other patients. Which of the four network characteristics has been violated in this situation?
- a) fault tolerance
 - b) scalability
 - c) security**
 - d) Quality of Service (QoS)
 - e) Reliability
9. What two statements correctly describe the link state routing process?
- a) all routers in the area have link state databases**
 - b) each router in the area floods LSAs to all neighbors
 - c) LSAs use the reserved multicast address of 224.0.0.10 to reach neighbors

- d) routing loops are prevented by running the Diffusing Update Algorithm (DUAL).
10. What two criteria are used to help select a network medium from various network media? (Choose two.)
- a) the types of data that need to be prioritized
 - b) the cost of the end devices utilized in the network
 - c) the distance the selected medium can successfully carry a signal**
 - d) the number of intermediate devices installed in the network
 - e) the environment where the selected medium is to be installed
11. What type of network traffic requires QoS?
- a) email
 - b) on-line purchasing
 - c) video conferencing**
 - d) wiki
12. A user is implementing security on a small office network. Which two actions would provide the minimum-security requirements for this network? (Choose two.)
- a) implementing a firewall**
 - b) installing wireless network
 - c) installing antivirus software**
 - d) implementing an intrusion detection system
 - e) adding a dedicated intrusion prevention device
13. Passwords can be used to restrict access to all or parts of the Cisco IOS. Select the modes and interfaces that can be protected with passwords. (Choose three.)
- a) VTY interface**
 - b) console interface**
 - c) Ethernet interface
 - d) boot IOS mode
 - e) privileged EXEC mode**

14. Which interface allows remote management of a Layer 2 switch?

- a) the AUX interface
- b) the console port interface
- c) the switch virtual interface**
- d) the first Ethernet port interface

15. What function does pressing the Tab key have when entering a command in IOS?

- a) It aborts the current command and returns to configuration mode.
- b) It exits configuration mode and returns to user EXEC mode.
- c) It moves the cursor to the beginning of the next line.
- d) It completes the remainder of a partially typed word in a command.**

16. While trying to solve a network issue, a technician made multiple changes to the current router configuration file. The changes did not solve the problem and were not saved. What action can the technician take to discard the changes and work with the file in NVRAM?

- a) Issue the reload command without saving the running configuration.**
- b) Delete the vlan.dat file and reboot the device.
- c) Close and reopen the terminal emulation software.
- d) Issue the copy startup-config running-config command.

17. Refer to the exhibit. A network administrator is configuring access control to switch SW1. If the administrator uses a console connection to connect to the switch, which password ase needed to access user EXEC mode?

Enter configuration commands, one per line. End with CIL/Z.

SW1(config)# enable password letasin

SW1(config)# enable secret secretin

SW1(config)# line console 0

SW1(config-line)# password ligojin

SW1(config-line)# login

SW1(config-line)# exit

SW1(config)# line vty 0 15

SW1(config-line)# password lmevtyin

SW1(config-line)# login

SW1(config-line)# end

SW#

a) letmein

b) secretin

c) lineconin

d) linevtyin

18. An administrator uses the Ctrl-Shift-6 key combination on a switch after issuing the ping command.

What is the purpose of using these keystrokes?

a) to restart the ping process

b) to interrupt the ping process

c) to exit to a different configuration mode

d) to allow the user to complete the command

19. A technician configures a switch with these commands:

SwitchA(config)# interface vlan 1

SwitchA(config-if)# ip address 192.168.1.1 255.255.255.0

SwitchA(config-if)# no shutdown

What is the technician configuring?

a) Telnet access

b) SVI

c) password encryption

d) physical switchport access
