Report of the Event

Name of the event: Workshop on “Data Mining Techniques”.

Name & profile of the speaker: Dr. Narendranathan, HOD/Aerospace, ACT, Chennai-600130.

Date: 21-10-2020.

Venue: N205/N-Block & 11am.

Number of participants: 58

Workshop on “Data Mining Techniques” was inaugurated on 21-10-2020 by the resource person. Principal Dr.J.Venkatesh, Sri Venkateswara College of Engineering and Technology, during his felicitation address he motivated the students to attend all the programs. Dr.Narendranathan, HOD/Aerospace,ACT,Chennai-600130,delivered details about Data Mining Techniques.

Data mining involves deriving meaningful insights from a given dataset. Data scientists do this by cleaning raw data, finding patterns, creating models and testing those models. Using these techniques, data scientists and data analysts extract useful information from a large data set. This information allows a company to make data-driven business decisions. Also, data mining is a powerful technique to find relationships and patterns in a data set as it turns raw data into useful information

Furthermore, it is an advanced analysis technique that uses machine learning and artificial intelligence to extract valuable information from a data set. This information helps a business learn more about their customer needs and provides solutions that resonate with customers.

Clustering is an essential technique as it creates meaningful clusters of data objects that share the same characteristics. It means that in a particular cluster, all objects are similar to one another.
