Report of the Event

Name of the event: Seminar on "Startup for Engineers".

Name & profile of the speaker: Dr.A.K.Ansari, Prof/Mech , SVCET.

Date: 28-01-2021

Venue: A204/Main Block & 10am.

Number of participants: 48

Seminar on "Startup for Engineers" was inaugurated on 28-01-2021 by the resource person. Principal Dr.J. Venkatesh, Sri Venkateswara College of Engineering and Technology, during his felicitation address he motivated the students to attend all the programs.

Dr.A.K. Ansari, Prof/ Mech, SVCET delivered details about Startup for Engineers.

Startup engineering means getting something to work well enough for people to buy. Startup engineering is concerned primarily with shipping a saleable product.

One of the primary things a startup engineer does is systems integration: keeping up on new technologies, doing quick evaluations, and then snapping the pieces together. The right tools can be like the difference between going to the library and hitting Google.

When building a startup, in the early days you want to first choose the best contemporary technology and then forget about technology to innovate on only one thing: your product. Outside of the core technology, you want to be as boring and vanilla as possible until you begin to make a serious profit from your first product.
