Copyright is a legal entitlement granted to the owner of intellectual property. As the term implies, it pertains to the right to duplicate or reproduce a creative work. Essentially, copyright signifies that when a person produces a piece of intellectual property, they acquire ownership rights. This means that only the creator or those they authorize have the exclusive right to reproduce or utilize that work. Copyright law provides the original creators of a work with an exclusive right to utilize it or make copies for a designated period. Over time, the copyrighted work may eventually enter the public domain.
