Patents are a measure of innovation. A healthy patent portfolio of a company indicates that the company has invested significant time, money, and effort in research and development activities within the organization. It also indicates that the company is evolving and constantly striving to bring newer and better products or services into the market.

- Allows the company to explore different markets without significant investments.
- Protects the company from competitors and patent trolls alike.
- Provides leverage for negotiation with competitors and partners alike.
- Significantly impacts the valuation of the company and its offerings.
