## REPORT OF THE PROGRAMME

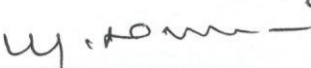

### 3. AIDS Awareness program

Programme Organized by	NSS Unit
Name of the Event Organized	AIDS Awareness program
Date of the Event	27-09-2019
No of the Students Participants	30
Venue	Pandur village
Faculty In-Charge	Mr.M Namachivayam
Contact Number	9940269316

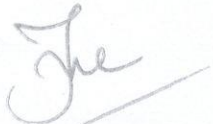

The NSS volunteers created awareness on AIDS among Pandur villagers on 27-09-2019. Mr. Namachivayam Assistant Professor in EEE Department, Sri Venkateswara College of Engineering and Technology initiated his speech with life is full of wishes, love and ambition.

AIDS is one of the most destructive pandemics in history. More than 38 million people have become the direct casualty of an HIV or AIDS related illness. The pursuit to find a cure for this life-threatening disease is still going on. Creating mass awareness about AIDS to people worldwide is extremely important. This makes World AIDS Day an important day to celebrate every year.

Our NSS volunteers distributed the pamphlets for creating awareness of AIDS to the general public and shops.

# 5 HIV FACTS

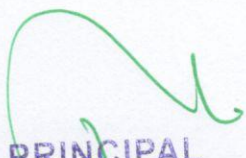

- 1 People on effective HIV treatment can't pass it on**  
Effective treatment for HIV suppresses the virus to such low levels that it can't harm you and you can't pass it on.
- 2 HIV can't be passed on through day-to-day contact**  
HIV can't be passed on through things like touching, kissing, sharing cutlery or glasses.  
HIV can be passed on through sex without a condom but only if a person is not on effective treatment. It can also be passed on through sharing needles and during pregnancy (but in the UK this is extremely rare because we have great treatment).
- 3 HIV can affect anyone**  
Some groups of people are affected by HIV more than others, but it can be passed on to anyone.
- 4 People living with HIV can live long and healthy lives**  
There isn't a cure for HIV, but there is excellent treatment. If you are diagnosed in good time and take your medication, you can have as long and healthy a life as everyone else.
- 5 There are many ways to prevent HIV**
  - Getting regularly tested for HIV if you are sexually active
  - Taking PrEP or PEP (tablets which prevent HIV either before or just after you've been exposed to it)
  - Using condoms
  - Never sharing needles
  - Taking your medication if you are living with HIV
