4.3 IT Infrastructure

4.3.1 Institution frequently updates its IT facilities and provides sufficient bandwidth for internet connection

System Resources

SVCET provides excellent IT facilities to students and faculty. The campus is equipped with 345 computer systems with LAN connections. ACER has made a highly configured computer available, with 8GB RAM and 500GB of storage. The server room is where two servers are kept to provide network connectivity on campus.

The ICT infrastructure is being maintained and supported by a full-time IT consultant at the college. LAN and network connections are functioning effectively. Both faculty and students are given access to a desktop system at the institution, allowing them to utilize computer aid for academic projects.

Wi-Fi and Internet

The campus is equipped with the latest technology and high-speed internet and wi-fi, a learning management system and accessories necessary for advanced studies. Internet is provided by BSNL, PRACHAAR services with bandwidth BSNL 100 Mbps, PRACHAAR 100 Mbps. Computers from different blocks are connected to the LAN via 10/100 rack switches. There are multiple Wi-Fi hotspots all over the campus including the hostel block to access educational resources via internet and intranet service. On campus, students can access internet service through different networks and are provided with 2 GB.

E-Services

In the learning of faculty and students, ERP is an effective learning management system. Attendance is properly maintained in ERP. A unique email ID will be created for all faculty members and students in the university domain name. All relevant information for interested groups can be found on the university's website, the faculty shares technological innovations on the website. The number of systems in every lab is adjusted according to the student's abilities.

PRINCIPAL
Sri Venkateswara College of
Engineering and Technology,
Thirupachur, Thiruvallur - 631 203

Google Classroom is used for the teaching and learning process in an emergency. Assignments and class notes are uploaded to Google Classroom on an as-needed basis. All students and faculty members can receive important messages through the text messaging facility. Management and staff members can quickly access and control key features and functions with the aid of the Enterprise Resource Planning (ERP) system.

Software Tools

The desktops are equipped with Windows 8 and Windows 10 operating systems. The college has purchased and routinely updates Office Automation packages, such as Microsoft Office and antivirus software. All common statistical, computational, econometric, and scientific typesetting packages, including lab view, Turbo-C++, Oracle/my SQL, MATLAB, WAMP Server, and IBM SPSS, are available for use at the college as either licensed or open-access software. Surveillance cameras are installed throughout the college for efficient security and monitoring.

Updating the IT Facilities

Every laboratory has updated its number of systems in response to the steady rise in the number of students enrolled. The student to computer ratio is maintained at 4:2:1 in accordance with AICTE guidelines. In order to conduct research and manage projects, highly configured systems must be maintained. Computer systems are based on the hardware and software requirements. The college central library allows students to use the internet-enabled system to familiarize themselves with technology.
