ORGANISED BY
THE DEPARTMENT OF
ELECTRONICS &
COMMUNICATION ENGINEERING

ABOUT THE COLLEGE

Sri Venkateswara College of Engineering and Technology (SVCET) is an engineering college located in Thirupachur, Tiruvallur, a district adjacent to Chennai city (formerly Madras), in Southern India.

The college was established in 1999 with AICTE approval and started functioning in 2000.

Sri Venkateswara College of Educational and Cultural trust which runs this college is committed to provide quality education in building the future of today's youth. In the era of globalization, working environment has become highly competitive and challenging.

Sri Venkateswara College of Educational and Cultural trust which runs this college is committed to provide quality education in building the future of today's youth. In the era of globalization, working environment has become highly competitive and challenging.

A Fine Arts Club at the college aims at developing the student's talents in music , drama, drawing, writing and elocution

Eligible students can avail scholarship facilities offered by both the Government of India and the Government of Tamil Nadu. Beside these ,the college management may also offer financial supporting deserving cases

ABOUT DEPARTMENT

The Department of Electronics and Communication Engineering is one of the major Departments of the Institute. The department is housed in a newly built building having modern amenities. The laboratories are well equipped with the latest software and hardware tools to give a practical hand to the students. A Seminar Hall, fully equipped with audio-visual aids and with the seating capacity of 120 students has been facilitated in the department. At times this department organizes the Guest Lectures for the students to bridge the gap between Industry and Academics.

ABOUT FDP PROGRAM

Discrete Time Signal Processing is concerned with the representation, transformation and manipulation of signals and the information they contain. Signal Processing has developed rapidly over the past few decades and has numerous applications in the field of Audio and Speech Processing, Radar, Sonar, Robotics, Big data, Bio medical and many more. In this course, we begin with the review of Signals and Systems including the summary of analysis and synthesis equation for Fourier Transforms tools and z-transform. An in-depth computation of DFT and FFT algorithms in spectral analysis and filtering applications is presented. This course develops different methods of filter design in both IIR and FIR and the corresponding structures.

TARGET AUDIENCE

Faculty members of all departments of Anna university affiliated colleges.

RESOURCE PERSONS

Resource persons from reputed Academic institutions and industries will deliver the sessions and handles the practical sessions

ACTIVITY / EVENT OBJECTIVES	<ol style="list-style-type: none"> To provide a comprehensive treatment of the important issues in design, implementation, and application of digital signal processing algorithms. To provide the student with a broad, yet strong background in techniques for processing digital signals 								
DESCRIPTION OF THE EVENT	<ul style="list-style-type: none"> This course covers fundamental digital signal processing (DSP) techniques that form the basis to a wide variety of application areas. Topics include discrete-time signals and systems, time domain analysis Solutions of difference equations, Z-transform analysis, discrete Fourier transforms (DFT), sampling theorem, and Fourier analysis of linear time-invariant systems The course also analyzes the broader impacts of DSP in a global, economic and societal context. 								
OUTCOMES OF THE EVENT	<ol style="list-style-type: none"> Know basic concepts of discrete-time signals and systems. Be able to analyze discrete-time systems by solving different equations. Understand the sampling theory and know techniques for processing continuous-time signals using digital systems. Be able to analyze linear time-invariant systems in frequency domain. Describe the use and development of a given technology as a human and cultured activity
