FACULTY DEVELOPMENT PROGRAM ON "ADVANCED MATERIAL PROCESSING AND CHARACTERISATION"

21.01.2020-25.01.2020

ORGANISED BY
THE DEPARTMENT OF
MECHANICAL ENGINEERING

ABOUT THE COLLEGE

Sri Venkateswara College of Engineering and Technology (SVCET) is an engineering college located in Thirupachur, Tiruvallur, a district adjacent to Chennai city (formerly Madras), in Southern India.

The college was established in 1999 with AICTE approval and started functioning in 2000.

Sri Venkateswara College of Educational and Cultural trust which runs this college is committed to provide quality education in building the future of today's youth. In the era of globalization, working environment has become highly competitive and challenging.

Sri Venkateswara College of Educational and Cultural trust which runs this college is committed to provide quality education in building the future of today's youth. In the era of globalization, working environment has become highly competitive and challenging.

A Fine Arts Club at the college aims at developing the student's talents in music, drama, drawing, writing and elocution.

Eligible students can avail scholarship facilities offered by both the Government of India and the Government of Tamil Nadu. Beside these, the college management may also offer financial supporting deserving cases.

ABOUT DEPARTMENT

Mechanical engineers research, design, develop, manufacture, and test tools, engines, machines, and other mechanical devices. Mechanical engineering is one of the broadest engineering disciplines. Engineers in this discipline work on power-producing machines such as electric generators, internal combustion engines, and steam and gas turbines. They also work on power-using machines such as refrigeration and air-conditioning equipment, machine tools, material-handling systems, elevators and escalators, industrial production equipment, and robots used in manufacturing. Some mechanical engineers design tools that other engineers need for their work.

ABOUT FDP PROGRAM

Focuses on new and advanced methods of manufacturing and materials processing with traditional methods described in light of the new approaches.

Maximizes reader understanding of the fundamentals of how materials change, what transport processes are involved, and how these can be simulated and optimized - concepts not covered elsewhere.

Introduces new materials and applications in manufacturing and summarizes traditional processing methods, such as heat treatment, extrusion, casting, injection molding, and bonding, to show how they have evolved and how they could be used for meeting the challenges that we face today.

TARGET AUDIENCE

Faculty members of Mechanical Engineering department of Anna university affiliated colleges.

RESOURCE PERSONS

Resource persons from reputed Academic institutions and industries will deliver the sessions and handles the practical sessions.
