REPORT OF THE PROGRAMME

1. Plastic Pollution Programme

Programme Organized by	NSS Unit
Name of the Event Organized	Awareness program on importance of gender equality
Date of the Event	15-3-2018
No of the Students Participants	30
Venue	Kolundhalur
Faculty In-Charge	Mr.M.Namachivayam
Contact Number	9940269316

The NSS volunteers created awareness on plastic free environment among Kolundhalur villagers on 15-3-2018. Mr.M.Namachivayam Assistant Professor, Sri Venkateswara College of Engineering and Technology initiated his speech with life is full of wishes, love and ambition. The NSS volunteers and staff explained the disadvantage of plastic bag to public. Today, I am here to deliver a speech on plastic waste management. The influx of plastics into our environment has reached crisis levels, and it is evident through the pollution of our oceans. Up to 12 million metric tons of plastic are expected to flood our ocean each year.

Our oceans are increasingly becoming plastic broth, and the effect on the survival of the oceans is chilling. Discarded plastic fishing lines entangle turtles and seabirds, and bits of plastic of all sizes choke and clog the stomachs of animals, from small zooplankton to whales, which confuse it for food. Plastic is now entering all layers of the food chain and is even showing up on our plates with seafood.

Our world can no longer accept throw-away plastics as a society. Our landfills are being filled up with single-use plastics, choking our waterways, and contaminating our oceans. Corporations have been blaming us all for far too long to deal with their own failed design problem. We have been advised that citizens should simply recycle the billions of tons of output from plastic companies and that it will make the required difference to sustain our world.

REPORT OF THE PROGRAMME

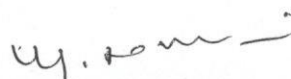

2. Awareness programme on Dengue

Programme Organized by	NSS Unit
Name of the Event Organized	Awareness programme on Dengue
Date of the Event	6-4-2018
No of the Students Participants	30
Venue	Thirupachur
Faculty In-Charge	Mr.M. Namachivayam
Contact Number	9940269316

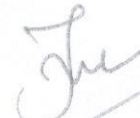

The NSS volunteers created awareness on Dengue among Thirupachur villagers on 6-4-2018. Mr.M Namachivayam Assistant Professor, Sri Venkateshwara College of Engineering and Technology initiated his speech with life is full of wishes, love and ambition.

Dengue is a mosquito-borne viral disease caused by the Dengue virus. In this case, the dengue virus is transmitted by female mosquitoes – *Aedes aegypti*. These dengue mosquitos generally bite during the daytime and are found everywhere. These mosquitos are found to be at the peak of their activeness at dawn and dusk. The symptoms can develop only after 6 to 10 days after being bitten by an infected mosquito.

Dengue fever is transmitted by mosquitos which carry the dengue virus, which has four varied serotypes to infect human beings. The serotypes mentioned above denote a set of microorganisms that are exceptionally closely associated. These microorganisms can only be distinguished due to them having somewhat dissimilar antigens which prompt the body to create some dissimilar antibodies. Dengue cases are more common in subtropical and tropical regions of our planet, including our country.

REPORT OF THE PROGRAMME

3. Tobacco awareness programme

Programme Organized by	NSS Unit
Name of the Event Organized	Tobacco awareness programme
Date of the Event	29-5-2018
No of the Students Participants	32
Venue	Pandur
Faculty In-Charge	Mr.M.Namachivayam
Contact Number	9940269316

The NSS volunteers created Awareness on Tobacco among Pandur villagers on 29-5-2018 Mr.M. Namachivayam Assistant Professor, Sri Venkateswara College of Engineering and Technology initiated his speech with life is full of wishes, love and ambition. Smoking is one of the leading causes of preventable deaths worldwide, and its effects are far-reaching and devastating. Not only does it harm the smoker, but also those around them, including family, friends, and co-workers. Quitting smoking is not easy, and it requires a lot of effort and commitment. However, the benefits of quitting are immense, and they are both immediate and long-term. First and foremost, quitting smoking improves our health. Smoking causes a range of health problems, including lung cancer, heart disease, stroke, and respiratory illnesses. By quitting smoking, we reduce our risk of developing these health problems and improve our overall health and well-being.

Quitting smoking also has an immediate impact on our finances. Smoking is an expensive habit, and the money spent on cigarettes can quickly add up. By quitting smoking, we can save a significant amount of money that can be put towards other important things, such as education, travel, or retirement. Quitting smoking also has a positive impact on our social life. Smoking can be a socially isolating habit, as many people are now choosing to avoid places where smoking is allowed. By quitting smoking, we can improve our social life and enjoy more activities with our friends and family.

REPORT OF THE PROGRAMME

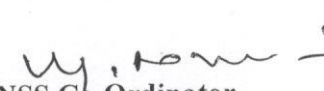

4. Awareness programme on rain water harvesting

Programme Organized by	NSS Unit
Name of the Event Organized	Awareness programme on rain water harvesting
Date of the Event	27-6-2018
No of the Students Participants	31
Venue	Kosavanpalayam
Faculty In-Charge	Mr.M. Namachivayam
Contact Number	9940269316

The NSS volunteers created awareness on rain water harvesting among Kosavanpalayam villagers on 27-6-2018. Mr.M Namachivayam Assistant Professor, Sri Venkateswara College of Engineering and Technology initiated his speech with life is full of wishes, love and ambition.

Today, I am here to deliver a speech on rainwater harvesting. Water harvesting is, in a broad sense, defined as the collection of runoffs for its productive use.' It is possible to harvest rainwater from the roofs and ground surfaces or intermittent or ephemeral streams. A variety of methods of water harvesting are available for various applications. The efficient use of harvested water includes the growth of provisions for domestic and livestock feed, the supply of crops, the processing of food and trees, and the construction of water bodies for the cultivation of fish and ducks.

Water harvesting incorporates different methods or activities focused on the use of runoff from un-cropped areas to replace the cropped areas with the harvested water. In addition, it is also important to store water for irrigation, domestic, or livestock use, but the use of harvested water for crop production is often given priority. In general, in arid and semi-arid areas where droughts occur very frequently and irrigation is not feasible, water harvesting is found to be very suitable.

REPORT OF THE PROGRAMME

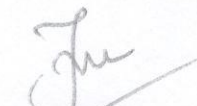

5. Tree plantation programme

Programme Organized by	NSS Unit
Name of the Event Organized	Tree plantation programme
Date of the Event	6-07-2018
No of the Students Participants	30
Venue	Kaivandur
Faculty In-Charge	Mr.M.Namachivayam
Contact Number	9940269316

The NSS volunteers planted trees at Kaivandur village on 6-07-2018. Mr.M. Namachivayam Assistant Professor, Sri Venkateswara College of Engineering and Technology initiated his speech with life is full of wishes, love and ambition.

In simpler words, tree plantation means to plant seedlings in the ground for growing more trees in an area. Tree plantation is very much required in countries where deforestation has increased a lot. With tree plantation, one can restrict the problems that may arise due to deforestation. One of the major problems of deforestation, which is pollution, can be reduced to some extent through the increased rate of tree plantation. In this short paragraph on tree plantation, it is cleared that tree plantation is very important. According to a tree plantation paragraph for Class 10, it is said that a reduced rate of tree plantation on heavy deforestation areas can cause climate change because deforestation increases the level of carbon dioxide, and without the required amount of tree, it is difficult to remove it from the air. Through this short essay on tree plantation, one can get some idea of what are the true requirements of tree plantation in today's time and why it is so important for the world.

REPORT OF THE PROGRAMME

6. AIDS Awareness programme

Programme Organized by	NSS Unit
Name of the Event Organized	AIDS awareness programme
Date of the Event	26-08-2018
No of the Students Participants	32
Venue	Koovam
Faculty In-Charge	Mr.M Namachivayam
Contact Number	9940269316

The NSS volunteers created awareness on AIDS among Koovam villagers on 26-08-2018. Mr.M.Namachivayam Assistant Professor, Sri Venkateswara College of Engineering and Technology initiated his speech with life is full of wishes, love and ambition. AIDS is one of the most destructive pandemics in history. More than 38 million people have become the direct casualty of an HIV or AIDS related illness. The pursuit to find a cure for this life threatening disease is still going on. Creating mass awareness about AIDS to people worldwide is extremely important. This makes World AIDS Day an important day to celebrate every year.

The virus still remains undefeated in spite of much scientific advancement. A person who is affected by HIV must be on lifelong medication as it is a chronic disease. A sad reality about this virus is that people do not know how to protect themselves and others from HIV. Social stigma and discrimination affect the many people living with the condition more than the virus. World AIDS Day is important because it reminds us that HIV still prevails in society and so is the social stigma around it. Need to spread awareness among people, to raise funds for patients and to fight prejudice against the discrimination HIV diagnosed people face is really high. The public must attain proper knowledge about the virus and how to treat people living with HIV fairly.

5 HIV FACTS

- 1 People on effective HIV treatment can't pass it on**
 Effective treatment for HIV suppresses the virus to such low levels that it can't harm you and you can't pass it on.
- 2 HIV can't be passed on through day-to-day contact**
 HIV can't be passed on through things like touching, kissing, sharing cutlery or glasses.
 HIV can be passed on through sex without a condom but only if a person is not on effective treatment. It can also be passed on through sharing needles and during pregnancy (but in the UK this is extremely rare because we have great treatment).
- 3 HIV can affect anyone**
 Some groups of people are affected by HIV more than others, but it can be passed on to anyone.
- 4 People living with HIV can live long and healthy lives**
 There isn't a cure for HIV, but there is excellent treatment. If you are diagnosed in good time and take your medication, you can have as long and healthy a life as everyone else.
- 5 There are many ways to prevent HIV**
 - Getting regularly tested for HIV if you are sexually active
 - Taking PrEP or PEP (tablets which prevent HIV either before or just after you've been exposed to it)
 - Using condoms
 - Never sharing needles
 - Taking your medication if you are living with HIV

REPORT OF THE PROGRAMME

7. Awareness Programme on Solid Waste Disposal

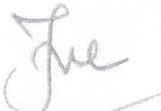

Programme Organized by	NSS Unit
Name of the Event Organized	Awareness Programme on Solid Waste Disposal
Date of the Event	30-08-2018
No of the Students Participants	32
Venue	Kolundhalur
Faculty In-Charge	Mr.M. Namachivayam
Contact Number	9940269316

The NSS volunteers created awareness on Solid Waste Disposal among Kolundhalur villagers on 30-08-2018. Mr.M. Namachivayam assistant professor, Sri Venkateswara College of Engineering and Technology initiated his speech with life is full of wishes, love and ambition.

Today, I am here to deliver a Speech on Waste Management. With human population development, new places for human settlements and more factories are needed to meet the increasing population's basic requirements. To increase the degree of productivity, various means of cultivation are then introduced through the use of pesticides and fertilizers. So much more is being done to have a comfortable lifestyle. But do you know what our world earns in exchange for our everyday sustenance? Unfortunately, it's garbage.

In reality, so much old stuff, such as bags and jars, can be recycled at your homes; while broken products can be repaired to reduce waste. It can be very useful for our climate, to reduce the amount of soil, air and water contamination. By recycling old waste, we won't have to rely a lot on natural resources that have been drained by continuous use. Thirdly, it takes a lot of resources to use raw materials to furnish a new item than by recycling old ones. This will mean that we will become more efficient in terms of energy, conserve it and it will also aid in bringing down the cost of products.

REPORT OF THE PROGRAMME

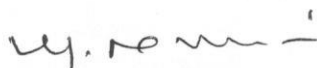

8. Awareness Programme on POSHAN MAAH Campaign-Nutrition

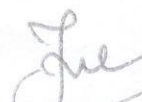

Programme Organized by	NSS Unit
Name of the Event Organized	POSHAN MAAH Campaign –nutrition Awareness program
Date of the Event	29-09-2018
No of the Students Participants	31
Venue	Thirupachur
Faculty In-Charge	Mr.M. Namachivayam
Contact Number	9940269316

The NSS volunteers created nutrition Awareness among Thirupachur villagers on 29-09-2018. Mr. Namachivayam Assistant Professor, Sri Venkateswara College of Engineering and Technology initiated his speech with life is full of wishes, love and ambition.

“POSHAN Abhiyaan is a Jan Andolan or “People’s Movement” by incorporating the participation of public representatives, social organisations, and private sectors,” the statement from the Ministry of Women and Child Development read.

According to Food and Agriculture Organization of United Nations’s report, ‘The State of Food Security and Nutrition in the World, 2020, 189.2 million people or 14 per cent of India’s population are undernourished. The report also highlights that 34.7 per cent of the children aged under five in India are stunted or too short for their age, while 20 per cent suffer from wasting, meaning their weight is too low for their height.

REPORT OF THE PROGRAMME

9. Awareness programme on Road Safety

Programme Organized by	NSS Unit
Name of the Event Organized	Awareness Programme on Road Safety
Date of the Event	11-01-2019
No of the Students Participants	30
Venue	Pandur
Faculty In-Charge	Mr. M. Namachivayam
Contact Number	9940269316

The NSS volunteers created awareness on Road safety among Pandur villagers on 11-01-2019. Mr. Namachivayam Assistant Professor, Sri Venkateswara College of Engineering and Technology initiated his speech with life is full of wishes, love and ambition. There are many ways in which we can improve road safety. In order to keep yourself safe and out of harm's way, we must always walk on the pavements meant for pedestrians. Do not jump or run on roads, as you never know when a vehicle might appear. Similarly, always follow the traffic signals religiously. Even if there is no one on the road and the signal is red, do not move until the light turns green. The obedience to traffic rules must not depend on the traffic on the road. One must follow them no matter what.

In addition, when you're on foot, always cross the road at zebra crossing only. Do not jump on dividers or more to do the same. Most importantly, always make sure to look both ways, left and right when crossing the road. Even if it is a one-way street, just because you are following the rules does not mean the other person is also doing the same. So keep your safety above everything else. Adults must not leave children alone on the road and never use your phone while driving or walking on the road. When in moving vehicles, always wear your seat belt. Similarly, when on a two-wheeler, do not forget your helmet. Finally, do not take out your head or hand in a moving vehicle. Always remember that your safety is in your hands. If you notice the driver being irrational or careless, correct them. Practice road safety and encourage children to do the same.

REPORT OF THE PROGRAMME

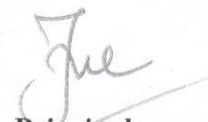

10. Awareness Programme on Personal Cleanliness and Hygiene

Programme Organized by	NSS Unit
Name of the Event Organized	Awareness Programme on Personal Cleanliness and Hygiene
Date of the Event	4-02-2019
No of the Students Participants	32
Venue	Kaivandur
Faculty In-Charge	Mr.M. Namachivayam
Contact Number	9940269316

The NSS volunteers created awareness on Personal Cleanliness and Hygiene among Kaivandur villagers on 4-02-2019. Mr.M Namachivayam Assistant Professor, Sri Venkateshwara College of Engineering and Technology initiated his speech with life is full of wishes, love and ambition.

We must practice habits related to personal hygiene such as washing hands and brushing teeth. It will help to keep bacteria, viruses, and illnesses away. Also, we can maintain cleanliness by not littering and letting others litter. We should not throw garbage here and there. We must use the dustbin. Moreover, we should clean the dustbin once in a day. If not cleaned, flies and mosquitoes would spread and cause harmful diseases. Furthermore, we can contribute to the welfare of the nation by keeping clean. A clean place is free from pollution. A pollution-free environment leads to sustainable development. Thus, we should adopt environment-friendly measures. We should avoid using plastic bags. Also, we should use biodegradable materials. Furthermore, we should recycle and reuse materials. We should also plant more and more trees to keep the environment clean. Planting of trees adds to the beauty of nature. Also, it provides greenery and life to everyone. Moreover, Narendra Modi has initiated a cleanliness campaign in the near past. This was known by the name "Swachh Bharat Abhiyan" or "Clean India Movement". He focused on the sweeping of streets for maintaining cleanliness. Students must listen to his motivating speech on cleanliness.

REPORT OF THE PROGRAMME

11. Awareness Programme on Cancer

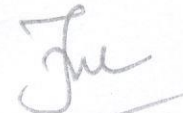

Programme Organized by	NSS Unit
Name of the Event Organized	Awareness Programme on Cancer
Date of the Event	22-02-2019
No of the Students Participants	32
Venue	Kosavanpalayam
Faculty In-Charge	Mr.M Namachivayam
Contact Number	9940269316

The NSS volunteers created awareness on Cancer among Kosavanpalayam r villagers on 22-02-2019. Mr.M Namachivayam Assistant Professor, Sri Venkateshwara College of Engineering and Technology initiated his speech with life is full of wishes, love and ambition.

Let us begin by knowing what exactly is cancer. Cancer is basically an abnormal condition of the body which enables the cancer cells, that are present in every human body to increase rapidly and spread to other organs as well. The percentage of cancer that has spread in the body is denoted by stages.

Some types of cancer are curable while other types can be cured if detected early on from its start. The last stage is the most painful stage and holds the threat of cancer cells spreading into the brain, causing brain death. Possible symptoms of cancer are abnormal lumps, coughing for a period longer than usual, abnormal bleeding, weight loss, weight gain and many others. Cancer day reminds us to be well aware of common symptoms of diseases like cancer that spread like wildfire in our bodies once prompted. We must always conduct regular checks and visit our doctors in case an abnormality is found.
