People are neglecting this fact, and as a result, desertification is happening worldwide.

The NSS volunteers, staffs planted trees around the Kosavanpalayam village. Around 25 plants were planted in Pandur village.

REPORT OF THE PROGRAMME

6. Awareness Programme on voting

The NSS unit of Sri Venkateswara College of Engineering and Technology, Tiruvallur, conducted an awareness programme on voting for the people of Thirupachur. Our College Principal, Dr. J. Venkatesh, presided over the function. Mr.M Namachivayam AP, EEE, Department NSS programme officer, Sri Venkateswara College of Engineering and Technology addressed about the information on importance of Voting.

Voting is an integral part of democracy, and it is necessary for people to have a voice. Everyone has the right to vote, which means that all Indians can vote for the Prime Minister of their choice. By voting, you can create change and make a difference in your community. It is also important to vote because you can only repeal a law if most citizens agree with it.

Voting is one way to be more civically engaged with your government. It is vital to make a difference in the world by having your voice heard and representing the views of people who don't have a voice. If you want to create change, voting is an excellent way.

The NSS volunteers created awareness on child labour among Pandur villagers on 7-12-2021. Our Principal Dr.J. Venkatesh presided the function and create awareness over the people and NSS volunteers about the Child labor. Child labour has been the most important concern in the world because it affects the children both mentally and physically. It also destroys the future of children. The Child labour act, 1986 defines a child as a person who has not completed the age of 14 years. Child labour is the practice of engaging the children in economic activity, on a part or full-time basis.

Our NSS volunteers distributed the pamphlets for awareness of Child labour to the general public and shops.

5 HIV FACTS

- 1** People on effective HIV treatment can't pass it on
Effective treatment for HIV suppresses the virus to such low levels that it can't harm you and you can't pass it on.
- 2** HIV can't be passed on through day-to-day contact
HIV can't be passed on through things like touching, kissing, sharing cutlery or glasses.
HIV can be passed on through sex without a condom but only if a person is not on effective treatment. It can also be passed on through sharing needles and during pregnancy (but in the UK this is extremely rare because we have great treatment).
- 3** HIV can affect anyone
Some groups of people are affected by HIV more than others, but it can be passed on to anyone.
- 4** People living with HIV can live long and healthy lives
There isn't a cure for HIV, but there is excellent treatment. If you are diagnosed in good time and take your medication, you can have as long and healthy a life as everyone else.
- 5** There are many ways to prevent HIV
 - Getting regularly tested for HIV if you are sexually active
 - Taking PrEP or PEP (tablets which prevent HIV either before or just after you've been exposed to it)
 - Using condoms
 - Never sharing needles
 - Taking your medication if you are living with HIV
