**EVENT REPORT**

Date : 25.09.2019

Name of Program : Seminar on embedded system  
Name of Resource person : S.Nishanth  
Date : 24.09.2019  
Time : 09.00 AM to 3.30 PM  
Venue : ECE lab  
Programme Outcome : PO9, PO10  
Total number of student's benefitted : 79

Topic covered in seminar are

**Definition:** An embedded system is a computer system designed to perform specific tasks or functions within a larger system or device.

**Components and Design Considerations**

- **Hardware:** Microcontrollers or microprocessors, sensors, actuators, memory, and communication interfaces.
- **Software:** Operating systems (RTOS or bare-metal), application software, and firmware tailored to the specific requirements of the embedded system.
- **Design Considerations:** Power consumption, size and weight constraints, reliability, and real-time performance.

**Applications of Embedded Systems**

**Importance of Embedded Systems**

**Future Trends in Embedded Systems**

### RESOURCE PERSON PROFILE

Name of the Resource person : S.Nishanth

Qualification : ME

Experience : 2 Years

S.Nishanth has a solid background in embedded systems. He has two years of experience in teaching, likely involving courses related to embedded. here the topics she covered in teaching .

"Embedded Systems: A Contemporary Design Tool"

"Real-Time Operating Systems for Embedded Computing"

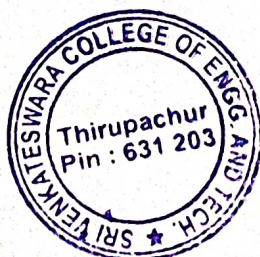

"Energy-Aware Computing: Challenges and Opportunities in Embedded Systems"

"Embedded Software: Facts, Figures, and Future"

"Security Challenges in Embedded Systems: Overview, Trends, and New Directions"

Respected Sir,

On behalf of the Training & Placement cell at Sri Venkateswara College of Engineering & Technology, we would like to make a request for your permission to conduct the “**Seminar on embedded system**”. The program will be held from 24.09.2019 for final Year electronics and communication students from Campus connect. kindly request you to grant permission to us to conduct the program successfully.

Thanking you.

Yours faithfully

**Simulation Capabilities**

- **Circuit Simulation:** PSpice simulates analog, digital, and mixed-signal circuits. It can handle complex circuits with multiple components, including passive components (resistors, capacitors, inductors) and active components (transistors, operational amplifiers, ICs).
- **Transient Analysis:** Simulates the circuit's response over time, useful for understanding dynamic behavior and transient effects.
- **AC and DC Analysis:** Performs AC (frequency domain) and DC (steady-state) analyses to evaluate circuit performance across different operating conditions.
- **Parameter Sweeps:** Allows variation of component values (e.g., resistors, capacitors) over a range to analyze circuit sensitivity and performance under different scenarios.
- **Monte Carlo Analysis:** Provides statistical analysis by simulating circuits with variations in component values to assess tolerance effects and reliability.
- **Noise Analysis:** Evaluates circuit noise performance, crucial for sensitive analog and mixed-signal designs.
